Solari Report Update

Physics, Power, and the Reinvention of Money with Dr. Joseph Farrell.

By Catherine Austin Fitts

This week on The Solari Report, Dr. Joseph Farrell joins me to discuss the deepest aspects of money and finance.

Our discussion weaves through Joseph's excellent series on banking and money: [Babylon Banksters](#), the [Financial Vipers of Venice](#) and [Thrice Great Hermetica and the Janus Age](#). We start with the physics that define our reality – from the alignment of the planets to economic cycles – and how they relate to ancient and modern governance systems, including currency and financial systems.

We explore the evolution of global leadership as an ancient international bullion elite evolves through ascendancy of medieval banking and the creation of insurance in Venice through the post WWII merger of Nazi leadership with the Anglo-American alliance.

We look at how these systems of hidden control relate to the current energy model as well as the development of digital technology and the creation of global digital currencies. Last but not least we engage in – as Joseph describes it – some “high octane speculation” about what is going on in the gold market today.

This is Farrell at his best – integrating his powerful understanding of history, science and geopolitics to make sense of life on this crazy, wonderful planet.

Highlights from Last Week's Report

"I've gotten many questions from subscribers over the last couple months about mind control. We've done an [introduction to mind control](#), which can be found in the archives, but I realized there was a need for a new round of discussion about mind control related to current events. There's nobody better to help me do it than Jon Rappoport. So, mind control, what is it?"
