## The Oil Card - What's Next? - Nov. 20th

To

*"Strange, strange are the dynamics of oil and the ways of oilmen." ~ Thomas Pynchon, Gravity's Rainbow*

Oil is down 23% year to date – most of that fall has been in the last three months.

What does it mean? There are many variables at play – new supplies coming on line, global economy slowing, better economics for renewables and the integration of information technology globally. What about our old friend the Oil Card?

Year](#)

With exploration moving into the Arctic, the US faces the possibility that Russia could surpass the US in reserves controlled. We know from our [recent interview](#) with Anne Williamson, that the US and allies were successful in the 1990's asserting greater control and ownership of Russian oil reserves and production capacity by particularly brutal means after successfully playing the Oil Card – manipulating the oil price lower to accelerate the collapse of the Soviet Union.

With Putin leading an effort to reassert sovereignty, including control of Russian oil and commodities, is the Oil Card game switching from checkmating China with a high price to bringing the Russians to heel with falling prices?

Veteran report Jim Norman returns to the Solari Report to discuss what is next for the Oil Card. If you have not read Jim's book *The Oil Card* it is one of our top picks for understanding the global economy and the world around you.

## **The Secret Space Program Videos are Now Available to Solari Report Subscribers!**

Our friends from [The Secret Space Program](#) have very kindly allowed us to provide the video to our subscribers!

“What is in space now and what can be? How does space influence all of our lives? Are there Cosmic Cultures and Civilizations? Are they visiting us, are they under us? If so, how will this impact our lives? Midst all the myths and legends, speculations and interpretations, theories and perspectives, fears and “research”, how does one discern the truth? With the spins and twists presented in books, documentaries, conferences and speakers, you might find your answers during this unique conference.

If we manage to ask the right questions and put some of the pieces together we

might be getting closer to some kind of answer – what is really going on out there? Who is really running things? What are their goals? Why are they behaving this way?”

## **Solari Report Subscription "Special Offer"**

Sign up for a one-year subscription to receive a free Solari Coin or a 6-month subscribe to receive a limited edition Solari cap!

The Solari Coin is a one ounce, silver round designed by Ben Lizardi of [Lizardi Studio](#) and minted by the Northwest Territorial Mint. The coin design features a solar armillary (the Solari logo) on one side and the horsemen of the Knights Templar on the other side. This coin is representative of Solari's purpose: to align interests, protect, guide, and lead through troubled times.

## **Highlights from Last Week's Report**

This week on The Solari Report, Chuck Gibson joins me for our quarterly Equity Overview.

In our [January Annual Wrap Up](#), I introduced the concept of the shift from Global 2.0 to Global 3.0. Rather than focus on the deterioration in the government systems from which assets have been shifted, I wanted to focus on the reinvestment of those resources. Where are resources going and what are the implications for our society and economy?

I explored these developments further in our [1st](#) and [2nd](#) Quarter Wrap Ups. The result was many excellent questions from subscribers about the implications for the equity markets and for your investment strategy.

To respond, Chuck and I decided to focus this Equity Overview on the investor's perspective on Global 3.0.
