Vaccine Exemptions with Alan Phillips - Nov. 27th

To

“Our children face the possibility of death or serious long-term adverse effects from mandated vaccines that aren’t necessary or that have very limited benefits” ~ Jane M. Orient, MD, AAPS (Association of American Physicians and Surgeons) Executive Director

This coming Thursday is Thanksgiving. Some of the people I will be giving thanks for are the many people in our network who protect our health freedoms, including attorney Alan Phillips.

[Turtle Forth](#)

[Alan Phillips](#), author of *The Authoritative Guide to Vaccine Legal Exemptions*, joins me on The Solari Report this week.

[Alan joined us on The Solari Report in 2009](#) when many of us were concerned about efforts to mandate a swine flu vaccine. He [joined us again in 2013](#) to address increased efforts to mandate vaccines for health care professionals as well as growing pressure on parents from school systems.

Subscribers have said they wish to avoid vaccines, but don't know how to handle various legal, regulatory and professional obstacles. We have asked Alan to help you understand how to get accurate information on the law and latest developments in this area.

The Secret Space Program Videos are Now Available to Solari Report Subscribers!

Our friends from [The Secret Space Program](#) have very kindly allowed us to provide the video to our subscribers!

“What is in space now and what can be? How does space influence all of our lives? Are there Cosmic Cultures and Civilizations? Are they visiting us, are they under us? If so, how will this impact our lives? Midst all the myths and legends, speculations and interpretations, theories and perspectives, fears and “research”, how does one discern the truth? With the spins and twists presented in books, documentaries, conferences and speakers, you might find your answers during this unique conference.

If we manage to ask the right questions and put some of the pieces together we might be getting closer to some kind of answer – what is really going on out there? Who is really running things? What are their goals? Why are they behaving this way?”

Highlights from Last Week's Report

Oil is down 23% year to date – most of that fall has been in the last three months.

What does it mean? There are many variables at play – new supplies coming on line, global economy slowing, better economics for renewables and the integration of information technology globally. What about our old friend the Oil Card?

With exploration moving into the Arctic, the US faces the possibility that Russia could surpass the US in reserves controlled. We know from our [recent interview](#) with Anne Williamson, that the US and allies were successful in the 1990's asserting greater control and ownership of Russian oil reserves and production capacity by particularly brutal means after successfully playing the Oil Card – manipulating the oil price lower to accelerate the collapse of the Soviet Union.

With Putin leading an effort to reassert sovereignty, including control of Russian oil and commodities, is the Oil Card game switching from checkmating China with a high price to bringing the Russians to heel with falling prices?

Veteran reporter Jim Norman returns to the Solari Report to discuss what is next for the Oil Card. If you have not read Jim's book *The Oil Card* it is one of our top picks for understanding the global economy and the world around you.
