## Breakthrough Energy with Joel Garbon - Feb 19

To

*"I do not think there is any thrill that can go through the human heart like that felt by the inventor as he sees some creation of the brain unfolding to success."~Nikola Tesla*

Oil and gas prices have dropped by almost 50% over the last year, with significant consequence to the values of companies, currencies and the balance of trade between nations.

## From The Blog

**February 26**

Financial Transparency with William Bergman

**March 05**

1st Quarter Equity Overview

[A Important Warning: Stop Any Call for a](#)

What is causing this drop? Clearly, the “Oil Card” is at play – the US manipulating prices lower to pressure Russia as part of economic sanctions. No doubt, a slowing global economy is also reducing demand. However, a wide range of new technologies are also at play – from fracking technology to a global smart phone revolution to increasing productivity in material sciences and renewable energy. However, there is always the possibility of breakthrough energy innovations in the mix.

To explore what is happening in breakthrough energy, I asked industrial scientist Joel Garbon, head of the New Energy Movement, to join us on the Solari Report to update you on the innovations underway. What is the likelihood that breakthrough energy may impact the economy in the foreseeable future? Talking with Joel is always a fascinating exploration of what is possible.

If you think G-7 central bank QE is fueling higher stock prices, wait to you see what happens If breakthrough drops in the price of energy should ever happen.

Catherine Austin Fitts

## Highlights from the 2014 Annual Wrap Up

On Thursday, January 8th, the Solari Report team published our Annual Wrap Up, complete with an online Web Presentation with graphs and charts to help you assess and digest the richness of our topic.

Here is what I will be covering:

- A Free and Inspired Life – our theme for 2015.
- Money Maps of the World – we have created a tool to review the “geo” of “geopolitics.”
- Planet Equity – our choice for the “big trend” to highlight this year.
- The Most Important Stories of 2014 and the Deeper Trends – I look at critical drivers in our culture and economy that define your opportunities and risks.

- 2014 Financial Market Round Up – a review of performance in the global financial markets.
- 2015: Get Ready, Get Ready, Get Ready – let’s talk about scenarios and strategies for this coming year.
- Vision 2020 – The Solari Report team wants to support your free and inspired life: here are our plans for 2015.
- Best Books for 2015 – Some of our favorite picks to keep you in the know this year.
- And the Winners are... – announcing the Solari Report hero, documentary and movie of the year.
- Credits and Closing – The Solari Report draws from the best and the brightest – we want to remind you of who they are and how you can enjoy their offerings.

This is a great way to start your year – with perspective!

## Highlights from Our Last Report

This week on The Solari Report, I am speaking with Dr. Nafeez Ahmed.

For many years I have found myself out of alignment with a remarkable number of financially sophisticated people who I like and respect. They say the global financial system is going to collapse. I say, no, it will slow burn. When we flush out the differences in our assumptions, I find that one of the driving variables is my assessment of how information technology is used to manage everything from popular opinion to consumer and financial markets. In short – invisible surveillance is far more invasive and powerful – by person, family and community – than even the most intelligent and knowledgeable among us understand.

My colleagues thought we lived in a market economy that was increasingly manipulated. I thought we increasingly lived in “The Truman Show,” a movie about a character who grew up and lived his entire life in a reality TV show.

Thanks to a series of investigative reporters and whistleblowers, the popular consciousness about information technology has begun to change. However, there is an enormous opportunity for investigative reporting to help us understand the evolution of the public-private partnership that runs the new info-control state and

how we navigate our lives as it attempts to harvest and manipulate us.

### Special Solari Report: In-State Equity Crowdfunding Offerings as an Alternative to Federal Jobs Act - Now Available to All Solari Readers!

***~The following article and accompanying table are intended for use as reference tools and as indications of the types of requirements and restrictions that may be found in various state statutes and regulations. They should not be relied upon, may not be current, accurate or complete and do not constitute legal advice for readers. Any small business interested in conducting a state crowdfunding offering should consult competent legal counsel in the applicable home state before taking any action.~***

*[CAF Note: Whenever I am interested in a highly complex legal and regulatory issue, I turn to our attorney Carolyn Betts to research and write something that distills the material down so that a serious entrepreneur can get the lay of the land before finding the right attorney. The goal is to take a very important issue and reduce the task of defining options to something a busy person can handle it. As the federal government has declined to create a regulatory pathway for crowdfunding to serve as a legitimate tool for entrepreneurs to raise equity capital, the states are proceeding to take action. If using crowdfunding to invest or raise capital with securities is of interest, do check out what is happening in your state. Here it is –*

*another tour de force from Carolyn Betts.]*
