Solari Report Update

1st Quarter Wrap Up: Planet Debt - Apr 23

To

"The United States can pay any debt it has because we can always print money to do that. So there is zero probability of default."

— Alan Greenspan

The dominant theme in our Annual Wrap up in January was Planet Equity. In our 1st Quarter Wrap Up, we explore a related part of the global balance sheet: Planet Debt.

National Security: Looking
Ahead with Colonel
Lawrence Wilkerson

[A Word from Our Sponsor](#)

The systematic harvesting of countries around the globe has been ongoing since WWII – whether by encouraging countries to issue debt, particularly dollar denominated debt, or to buy US debt. It is not surprising that some of the biggest buyers of US Treasury securities are nations that have had a US military presence since WWII. Nor is it surprising that there is a relationship between large military expenditures and high debt levels.

What has evolved on planet earth is the ultimate financial entrapment operation in which one set of players can:

- Create fiat money and lend at zero expense
- Maintain an information advantage that violates the laws related to material omissions in financial transactions, fraudulent inducement and predatory lending
- Engage in dirty tricks that impact the borrower's ability to pay
- Legislate laws and regulations that make it profitable to lend to people who fail and cannot pay back their debt principal

On Thursday, April 23, the Solari Report team will publish our First Quarter Wrap Up, complete with a web presentation including graphs and charts designed to “pull back the curtain” on this important subject.

I will be covering:

- How global debt is an essential part of the central banking-warfare model
- Debt and the “Databeast”
- Global and domestic blowback resulting from debt
- Mandating markets for monopolists
- Q1 News stories and trends
- Q1 Financial markets
- Where it's all going

Special Offer – Solari Coin - Offer Ends April 30, 2015

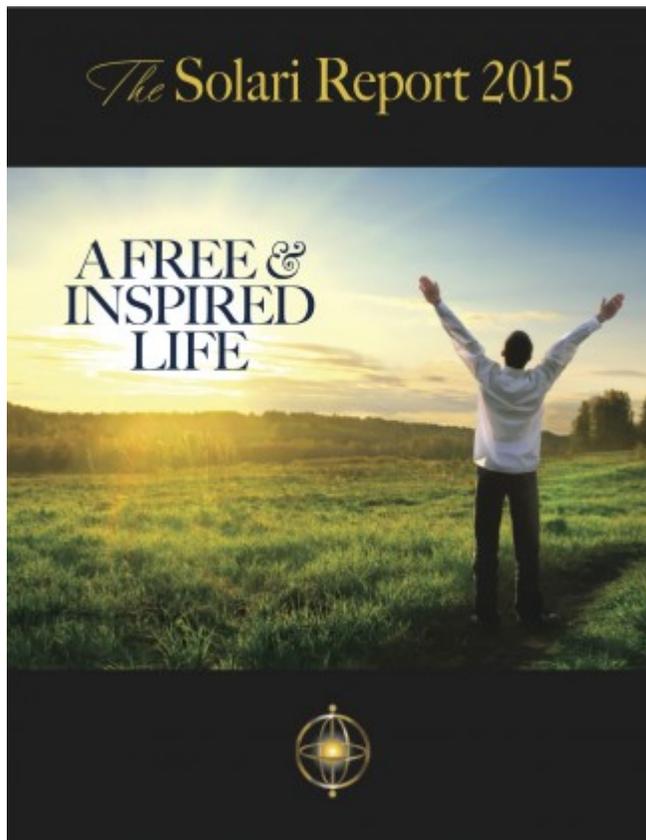

The Solari Coin is a one ounce, silver round designed by Ben Lizardi of [Lizardi Studio](#) and minted by the Northwest Territorial Mint. The coin design features a solar armillary (the Solari logo) on one side and the horsemen of the Knights Templar on the other side. This coin is representative of Solari’s purpose: to align interests, protect, guide, and lead through troubled times.

We are currently offering a Solari coin to *Solari Report* subscribers who sign up for a full year subscription.

Sign up for a 1-year non-refundable *Solari Report* subscription and receive a Solari coin!

Highlights from Our Last Report

I often refer to the *central banking / warfare model*, a methodology which allows anyone who can create debt in currencies they can print virtually to harvest locations and countries around the globe.

If you look at how the Euro affected southern Europe, it consolidated economic value by *shrinking* it. In this way, locations and even complete nations were harvested.

As I look at the squabble between Russia, Europe and the US, what’s most frightening is to watch the loss of sovereignty by not just nations but by millions of

people.

On this week's [Solari Report](#), I speak with investigative reporter Anne Williamson from Budapest. We will cover this topic and many others:

- What was behind the EU's desire to expand East?
- European goods can enter Russia via the Ukraine — why this makes the country so special.
- Three European nations which have previously invaded Russia — Lithuania, Poland, and Sweden — created trade agreements on Russia's periphery. Why?
- Off-the-radar: the US has sent emissaries to Armenia, Kyrgyzstan, and Georgia to try to stir up more trouble.
- Does the early success of the Asian Infrastructure Investment Bank mean that U.S dominance is over?
