Solari Report Update

National Security: Looking Ahead with Colonel Lawrence Wilkerson - May 07

To

*"If you like Iraq and Afghanistan, you'll love Iran."
~ General Anthony Zinni*

This week on the [Solari Report](#) I will be speaking with returning guest, [Colonel Lawrence Wilkerson](#) who is currently a visiting professor at the College of William & Mary.

Col. Wilkerson served for 31 years in the US Army, a career highlighted by his service as Special

Global Debt - USA
Watchdog Interview](#)

Assistant to Gen. Colin Powell as Chairman of the Joint Chiefs of Staff (1989-93) and as Chief of Staff to Powell when he was Secretary of State. After volunteering for the US Army, Col. Wilkerson served as a helicopter pilot in the Vietnam War.

We'll be discussing the implications of the Iran deal and its implications for Europe (good), Israel (not so good), and the US (let's see). As Col. Wilkerson points out, this agreement offers a *far* better alternative to war.

We'll also be discussing the pivot to Asia, a move which has yet to be felt in the Far East. How might the Trans-Pacific Partnership and the Asian Infrastructure Investment Bank affect this turn?

Colonel Wilkerson feels strongly that the US should not be seen as *just* a military power: "A huge challenge is that we will have (9) billion people by mid-century. We're not going meet these challenges individually and we're not going to meet them with bombs, bullets and bayonets."

Colonel Wilkerson gives an excellent assessment of the challenges facing the United States – and addresses what I believe is our #1 financial problem: leadership. This is a great interview – you don't want to miss it.

Highlights from Our 1st Quarter Wrap Up: Planet Debt

The dominant theme in our Annual Wrap up in January was Planet Equity. In our 1st Quarter Wrap Up, we explore a related part of the global balance sheet: Planet Debt.

The systematic harvesting of countries around the globe has been ongoing since WWII – whether by encouraging countries to issue debt, particularly dollar denominated debt, or to buy US debt. It is not surprising that some of the biggest buyers of US Treasury securities are nations that have had a US military presence since WWII. Nor is it surprising that there is a relationship between large military expenditures and high debt levels.

What has evolved on planet earth is the ultimate financial entrapment operation in which one set of players can:

- Create fiat money and lend at zero expense
- Maintain an information advantage that violates the laws related to material omissions in financial transactions, fraudulent inducement and predatory lending
- Engage in dirty tricks that impact the borrower's ability to pay
- Legislate laws and regulations that make it profitable to lend to people who fail and cannot pay back their debt principal

On Thursday, April 23, the Solari Report team will publish our First Quarter Wrap Up, complete with a web presentation including graphs and charts designed to “pull back the curtain” on this important subject.

I will be covering:

- How global debt is an essential part of the central banking-warfare model
- Debt and the “Databeast”
- Global and domestic blowback resulting from debt
- Mandating markets for monopolists
- Q1 News stories and trends
- Q1 Financial markets
- Where it's all going

Highlights from Our Last Report

I sent best-selling author [Whitley Strieber](#) a copy of our annual wrap up and challenged him to tell us what we should add to our analysis. Whitley joins me this week on the [Solari Report](#) to discuss a number of fascinating topics which he believes are critical to understanding our world and times:

- Pacific ocean warming patterns and the possibility of a protracted drought on the US' West Coast
- A decline in air circulation over the northern hemisphere caused by a slowing Gulf Stream
- Atmospheric flares and increased volcanic activity
- Retaining and growing wealth amidst sweeping earth changes
- The Large Hadron Collider and the possibility of parallel universes
