Solari Report Update

The Bilderbergers with Dr. Joseph Farrell - June 11th

To

"President Truman decided after the war to create a vast system of hidden finance using the Nazi access loot and put the American intelligence community in the role of international bankers."

~ Dr. Joseph Farrell

This week on the [Solari Report](#), I will be joined by long-time collaborator [Dr. Joseph Farrell](#) to discuss this month's [Bilderberg meeting in Austria](#) and the Bilderberger's impact on policy development,

From The Site

conscious banking and decision making for transnational global finance and geopolitics.

Dr. Farrell will pick up where he left off on a previous *Solari Report*:

The first Bilderberg meetings were brokered on the Western side primarily by the Rothschilds and Lawrence Rockefeller with David in the background. On the European side, they were brokered by Prince Bernhard and a man who was a prominent member of the early Bilderberg meetings, Dr. Hermann Josef Abs. He was the **CEO of Deutsche Bank**.

Most people are unaware that Prince Bernhard was part of the management of **IG Farben**. In other words, he was plugged into the financial structure of the Third Reich in a major way.

With Herman Josef Abs, we have an individual who was also plugged into that structure. During and prior to WWII, Abs ran a handling bank in Berlin that handled all of the Reich government accounts. In other words, he was the guy **signing Adolph Hitler's paycheck** as chancellor.

So, we're dealing with people coming together to coordinate all of this vast Nazi loot that's been moved into Western banks. I suspect that it was kept off the books as a hidden reserve in order to **expand post-war credit-**

making ability. I think the reason why this happened was so that all the plundered Axis loot could be cycled back into Europe with everybody getting their cut.

This is a story which is known by the Russians and it **must be known by Mr. Putin**, particularly as he came out of the KGB. It's interesting to note that Mr. Putin did his PhD thesis precisely in the areas of economies, markets, and finance. So he would be well aware of what the post-war financial gains had been.

Who is really running the show? As you know, I think it is essential to try to understand the real governance system – both who is in charge and how decision-making and resource allocations really works.

Catherine Austin Fitts

The Trans Pacific Partnership Agreement and Trade Promotion Authority - Available for the Public!

A note from Catherine Austin Fitts: As the Obama Administration moves forward aggressively with the TPP, I felt it was important for Solari Report subscribers to have an introduction and overview of the basic facts and issues involved. After much searching, I could not find such a presentation, so I asked attorney Carolyn Betts to prepare one for the Solari Report. As always, Carolyn has done an excellent job of giving us an overview of a highly complex legal agreement – one that could have a

profound impact on our work and lives. The fundamental issue at hand is whether the nations involved in TTP are going to be sovereign nations or whether we are going to introduce global government by using trade agreements to override national, state and local laws – often without the involvement, agreement and concurrence of the authorizing legislators – and do so in a format that gives large corporations extraordinary rights, making them superior in legal powers to people and governments.

By Carolyn Betts, Esq.

What is the Trans Pacific Partnership Agreement?

The Trans Pacific Partnership Agreement is a proposed regional international trade agreement that has been under negotiation since 2005 among Pacific Rim nations, currently numbering the following twelve:

Australia, Brunei, Canada, Chile, Japan, Malaysia, Mexico, New Zealand, Peru, Singapore, United States, Vietnam.

Highlights from Our 1st Quarter Wrap Up: Planet Debt

The dominant theme in our Annual Wrap up in January was Planet Equity. In our 1st Quarter Wrap Up, we explore a related part of the global balance sheet: Planet Debt.

The systematic harvesting of countries around the globe has been ongoing since WWII – whether by encouraging countries to issue debt, particularly dollar denominated debt, or to buy US debt. It is not surprising that some of the biggest buyers of US Treasury securities are nations that have had a US military presence since WWII. Nor is it surprising that there is a relationship between large military expenditures and high debt levels.

What has evolved on planet earth is the ultimate financial entrapment operation in which one set of players can:

- Create fiat money and lend at zero expense
- Maintain an information advantage that violates the laws related to material omissions in financial transactions, fraudulent inducement and predatory lending
- Engage in dirty tricks that impact the borrower's ability to pay
- Legislate laws and regulations that make it profitable to lend to people who fail and cannot pay back their debt principal

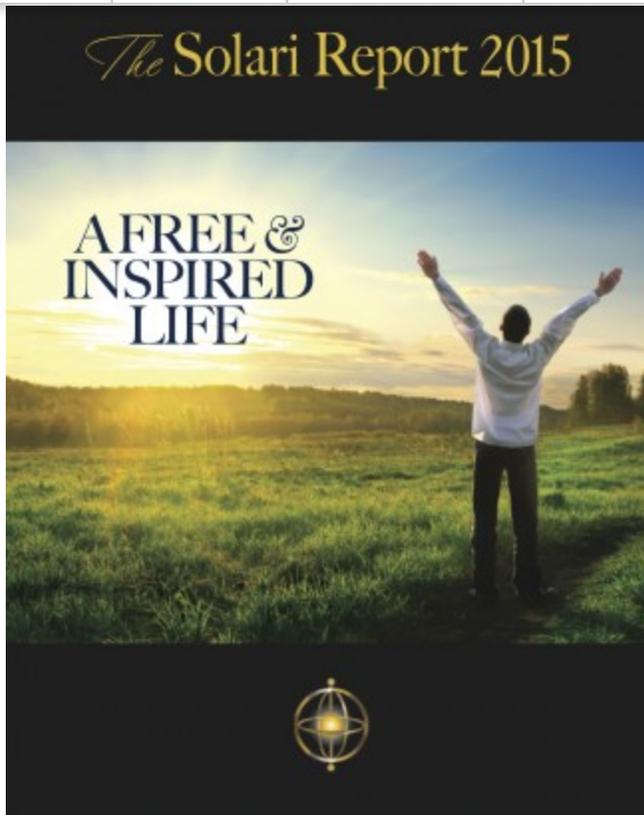

On Thursday, April 23, the Solari Report team will publish our First Quarter Wrap Up, complete with a web presentation including graphs and charts designed to “pull back the curtain” on this important subject.

I will be covering:

- How global debt is an essential part of the central banking-warfare model
- Debt and the “Databeast”
- Global and domestic blowback resulting from debt
- Mandating markets for monopolists
- Q1 News stories and trends
- Q1 Financial markets
- Where it's all going

Highlights from Our Last Report

“Six years of ingesting financial heroin has doubtless anesthetized most bond investors. They may be about to experience a pain they have not felt in decades.”

~ Don Coxe

[Don Cox](#) has 42 years of institutional investment experience in Canada and the US.

As a strategist and investor, he has been engaged at the senior level in global capital markets through every recession and boom since the onset of stagflation in 1972. He has worked on the *buy* side and the *sell* side in many capacities and has managed both bond and equity portfolios, served as CEO, CIO and as Research Director.

Don leads the *Global Commodity Strategy* investment management team – a collaboration of *Coxe Advisors* and *BMO Global Asset Management*. He is advisor to the *Coxe Commodity Strategy Fund* and the *Coxe Global Agribusiness Income Fund* in Canada, and the *Virtus Global Commodity Stock Fund* in the US.

In our discussion on the [Solari Report](#) this week, Don reviews the nine sovereign bond credits that are now trading at negative interest rates at maturities from 1 to 10 years. He explains that there is literally is *no precedent* for what the bond market is about to experience as a result of negative interest rates. He reminds us, “Not only is there nobody managing money today who was managing Treasury Bonds back in the Kennedy administration, there are very few who were managing bonds in the bear market under Nixon.”

Other thoughts from our discussion this Thursday:

- When you find out that pre-Napoleonic war yields were higher than current bond yields, you realize that we do not have precedence. If you open the text books, you will not find *anything* that will prepare you for what has to happen as we go to “normal” yields.
- We’re talking about tremendous dislocations in a huge pile of assets that will send all the other markets in different directions.
- It is possible that people at the Fed may be saying: “If it’s going to happen when *I’m* here, then I’m going off the FOMC next year.”
- Although there will be opportunities, the biggest opportunities are likely to include equities (versus bonds).
