## Rambus: Are We in a Deflationary Spiral? - Jan. 28th

To

*"The illusion of randomness gradually disappears as the skill in chart reading improves."*

~ **John Murphy**

Rambus (of [Rambus Chartology](#)) joined us in October, 2015. In a written interview to review his technical analysis regarding "*The Dollar, Gold, & the S&P 500.*" This *Solari Report* was so popular that I have invited him to update our subscribers every quarter in 2016.

In this week's report, Rambus will review global charts (in written form) including updates on the dollar, gold, and the equity markets. We will address the question, "Are we in a deflationary spiral?"

Two weeks ago, Rambus published a [long-term chart \(above\)](#) of the [Thomson Reuters/Core Commodity CRB Index](#). He described it as “the scariest chart on the planet.” Such a chart flies in the face of fundamental analysis. After all, there is a growing population, rising global incomes and fewer commodities as we continue to extract resources from the planet. These are the days of *peak everything*, right?

Such fundamental analysis, however, depends on the “official” reality. When there are wide gaps between what is verifiable fact and the official reality, technical analysis challenges us. What does *price* say? What does the market know?

Results, of course, speak for themselves, and Rambus has produced some big ones. Among his most memorable was calling the downturn in precious metals prices in 2011. Like yours truly, he also experienced the wrath of the goldbugs thanks to that call. Price can be a cruel friend...or one that protects us from ideologies that have run off the rails.

I hope you'll join us on the *Solari Report* this Thursday. If you're not a subscriber yet, [you can learn more about becoming one here](#).

From the transcript:

**Catherine Austin Fitts:** Since WWII, one of the largest government investments in the developed world has been keeping citizens in the dark regarding outer space and what humans may be doing there. At the same time, the amount of money disappearing into hidden systems of finance and black budgets (likely related to space programs and space weaponry) indicates that there is quite a lot going on in space. Whether this secrecy relates to the UFO phenomenon, our response to it, or to the hidden control of sovereign governments, the financial system and the general population remains a mystery.

Those of us who were inspired by President Kennedy's support of space exploration believed that we were headed into space in a major way a long time ago. After Kennedy's death, the NASA budget peaked at 4.5 percent of the federal budget. It is currently 0.5 percent.

Dear Friends:

Each of us at Solari sees and hears the need for restoration and rejuvenation throughout our lives and work. We hear the effort to apply the Golden Rule in our lives, our work and our finances. We hear a call for a positive and productive way forward through the changes upon us. We are often asked, “What can I do?” One of the things each one of us can do is to pray. No matter how pressed our schedule is, there is always time for prayer.

On behalf of the entire team at Solari, Happy New Year!
