## Detoxing from Toxic Vaccines with Dr. Laura Thompson - June 16<sup>th</sup>

To << Test First Name >> << Test Last Name >>

*"Oh my God. I cannot believe we did what we did. But we did." ~ Dr. William Thompson, CDC Senior Scientist & Whistleblower*

Publicity regarding the new documentary [Vaxxed: From Coverup to Catastrophe](#) has stirred the political cocktail created by heavy schedules of vaccines, vaccination mandates, and the rising levels of autism in children, particularly in boys. Among other things, *Vaxxed* tells the story of the CDC scientist Dr. William Thompson, who confessed that the CDC had omitted crucial data that revealed a causal relationship between the MMR vaccine and autism. We hear estimates that, if current rates continue, by 2032 one out of every two children – and 80% of the boys – in America could be autistic.

This is an issue of great concern. If one out of every 60 children in America today becomes autistic, potentially millions more children and their families, and household financial security are being harmed or destroyed, here and throughout the rest of the world. We need to reverse the rising trend.

Vaccination mandates are a subset of an astonishingly inhuman assault on health freedom. At some point one must ask, "are we humans or livestock?" US government health care policy appears to be driven by the notion or calculation that

our bodies are government property and that private commercial interests can dictate and experiment, as they like.

Several months ago my Solari Circle began a discussion about how to communicate with loved ones about the risks of vaccines, particularly heavy schedules of vaccines. We decided to review existing materials and to discuss different approaches to communicate with loved ones about this sensitive topic.

One question was how to help people injured by a toxic vaccine. That is a great question. What do you do when you or someone you love has an adverse reaction to a vaccine? I invited Dr. Laura Thompson, founder of the Southern California Institute of Clinical Nutrition, to join me this week to address the question. As luck would have it, Laura has just seen a showing of *Vaxxed*, including a Q&A with the film-makers and a participating mother, and gave us a review.

In addition, we discuss my review of the documentary [Trace Amounts](#), this week's choice for *Let's Go to the Movies*. *Trace Amounts* was recommended by Robert De Niro. It addresses mercury poisoning, including the toxin thimerosal, a mercury-related preservative used in some vaccines.

Catherine Austin Fitts

### Highlights from Last Week - The Emerging Multipolar World with Saker: Russia, Ukraine & the Risks of War

The Saker hears the drumbeats of war. On this week's Solari Report, Saker and I discuss his latest, [A Russian Warning](#) co-authored with Dmitri Orlov and Dr. Eugenia V Gurevich:

*"We, the undersigned, are Russians living and working in the USA. We have been watching with increasing anxiety as the current US and NATO policies have set us on an extremely dangerous collision course with the Russian Federation, as well as with China. Many respected, patriotic Americans, such as Paul Craig Roberts, Stephen Cohen, Philip Giraldi, Ray McGovern and many others have been issuing warnings of a looming Third World War. But their voices have been all but lost among the din of a mass media that is full of deceptive and inaccurate stories that characterize the Russian economy as being in shambles and the Russian military as weak—all based on no evidence. But we—knowing both Russian history and the current state of Russian society and the Russian military, cannot swallow these lies. We now feel that it is our duty, as Russians living in the US, to warn the American people that they are being lied to, and to tell them the truth. And the truth is simply this: **If there is going to be a war with Russia, then the United States will most certainly be destroyed, and most of us will end up dead.**"*

The Saker gives us an update on the Ukraine and the impact, along with events in the Middle East and US and European sanctions, on the Russian economy. We cover the ancient history of tensions between Russia and the Western nations and revisit why the Russian people are so supportive of Putin's efforts to resist accommodation. Saker suggests some of the actions we can each take to reduce the chances of war.

Our discussion raises important questions about the shift to a multi-polar world. If the US offers countries two options – submit to multinational corporate control or be destroyed – it is only a matter of time before the world shifts into a deflationary spiral or war. Where are the incentives to cooperate and honor agreements that are the basis of global economic growth?
