Because our “in person, in depth” discussions in the *3rd Quarter 2017 Wrap Up* were popular, Dr. Farrell and I used the same format again for our discussion of *News Trends & Stories* for the *2017 Annual Wrap Up*. Inasmuch as our discussion is lengthy, we will publish both full-length and chapter-length versions so you can listen selectively if you prefer. These discussions explore the events of 2017 to find the most important developments that will inform the year ahead. This in-depth discussion has been immensely productive for both Dr. Farrell and myself.

In our third week I will cover equity markets and publish the first Blockbuster Chartology from Rambus for the new year, 2018.

In the final week we will address our **2017 Annual Wrap Up theme: *Does Your Pension Fund Have a Deep State Drain?*** Money is going missing in many directions. It's time to ask some serious questions about whether and how this is impacting our pension funds. In the United States and many countries, taxpayers are on the hook for corporate and government pension funds. Whether you have a pension fund or not, this will impact your finances and the finances of your neighbors and community too.

In *Money & Markets* this week I will discuss the latest in financial and geopolitical news.

In *Let's Go to the Movies*, I will review *The Crown*, the *Netflix* series that explores the life and 66-year reign of Queen Elizabeth II. I will touch on the role of the British Royal Family in the changing political landscape and the shift to Global 3.0.

## **Special Solari Report - The Appropriations Clause: A History of the Constitution's (As of Yet) Underutilized Clause**

*"No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time."* ~ARTICLE I, SECTION 9, CLAUSE 7, UNITED STATES CONSTITUTION

[CAF Note: The Solari Report is pleased to present the first report in a new series that we have commissioned on U.S. Constitutional and legislative provisions that relate to the enforcement of federal financial laws. The existing levels of \$21 trillion of undocumentable adjustments in federal accounts (and counting) have surpassed official levels of outstanding U.S. debt. This underscores the importance of the enforcement of financial laws for our mutual global future. Consequently, this series is open to the public.]
