*the driver of social protests. In China its pork....”~*  
Dr. Pippa Malmgren, 2013

This week on The Solari Report, Harry Blazer continues a conversation with Bill Niman that they began earlier this year, with Bill being [Bill Niman – Godfather of Grassfed](#). This week their focus is on hogs and Bill’s success at raising some of the finest pork in the world. No one knows more about raising the noble pig than Bill and his team. Indeed, Bill’s wife Nicolette is author of [Righteous Porkchop: Finding a Life and Good Food Beyond Factory Farms](#).

Because of the popularity of pork in Asia, this food is at the heart of the global focus on feeding a large and growing global population. As the Asian middle class expands, so does the demand for meat and animal protein. As we discussed in our *2016 Annual Wrap Up, Global Harvest*, the pressures and politics of food grow ever more serious. Harry and Bill discuss what this means for the farmer and ranchers who attempt to maintain quality and high standards.

## The Missing Money - How Would You Write the Movie? with Rob Kirby

*“Once you eliminate the impossible, whatever remains, no matter how improbable, must be the truth.” ~ Sir Arthur Conan Doyle*

By Catherine Austin Fitts

From fiscal 1998-2015, the Department of Housing and Urban Development had almost \$1 trillion of undocumented adjustments. The Department of Defense had approximately \$20 trillion of undocumented adjustments. (See [Missing Money](#))

Indeed, during this period these agencies and the US government failed to comply with the Constitution, laws and regulations relating to financial management. (See our [series](#) on the legal provisions related to US government financial management)

If you think this is acceptable, try the same approach on your next IRS filing and see what that division of the US Treasury says and does in response.

I often hear that it is not possible for \$21 trillion in real assets – whether cash, government securities or credit or armaments and hard assets to be stolen over a twenty year period. That is absolutely **not** correct. It is more than possible.

Another response is that if this much had indeed be printed, created or in circulation that we would have hyperinflation. Not so. (Although, real inflation is running at a much higher rate than the official statistics indicate. See: <http://www.chapwoodindex.com/>)

To help you understand the mechanics of how so much money could go missing as

well as how it could be reinvested or circulated without hyperinflation, I invited Rob Kirby of [Kirby Analytics](#) to join me for an exercise in imagination.

If Rob and I were screenwriters and we were going to write a movie about the missing money, what would the various financial fraud schemes we would consider for our plot be? Which would we choose? And how would we make sure inflation would not give us away? How would we make sure that the majority of Americans would not notice that the savings in their pension funds, IRAs and 401ks was being laundered through the US government and they would ultimately be liable for the related IOUS?

Join us in the imagination room for a wild ride through the financial ecosystem and our thoughts on what has been going on in the darkest corners of the financial and pension systems as they fund the national security state.

## Allergic to Numismatic Coins

*Nothing real can be threatened.*

*Nothing unreal exists.*

*~ A Course in Miracles*

**[CAF Note: I published this comment in September 2017. I am republishing as confusion persists on the desirability of numismatic coins. My opinion?**

## **Franklin Sanders is being kind – read on.]**

By Catherine Austin Fitts

Franklin Sanders has written an article “What is a Numismatic Coin, What the Law Really Says... and Why You Should Not Buy Them!.” He defines the numismatic coin:

“The loosely used, popular definition of a “numismatic” coin is one that collectors will pay a premium for. When used as “numismatic” versus “bullion” coin, people usually mean a collector’s coin versus a coin sold for a small premium over its metal value. The first is an investment in a coin, never mind its precious metal content; the second is an investment in silver or gold, never mind that it’s a coin.”

If someone is aggressively marketing numismatic coins, at Solari we do not post any of such marketer articles and interviews on the Solari Report.

This Solari choice has a history.
